The screenshot shows a Trello board titled "Plan" within a workspace named "Medirecord". The board is viewed in Google Chrome. The main card, "Plan", is in the "Done" list. It has a description: "Research features, scope of project, development timeline, test plans". Below the description is a checklist with the following items: "research features", "scope project", "create local directories", "create git repo", "development timeline", "test plans", and "create development checklist". The checklist is currently 0% complete. To the right of the card, there are options to "ADD TO CARD" (Members, Labels, Checklist, Due Date, Attachment) and "ACTIONS" (Move, Copy, Watch, Archive). Below the card is an "Add Comment" section with a text input field and a "Share and more..." link. On the left side of the board, there is a sidebar with "Things To Do" which includes "Update after test - bug fixing" and "Presentation". On the right side, there is an "Activity" sidebar showing recent actions by James Hicks, such as "completed patient and doctor logins on Develop" and "made this board visible to members of its team". A red banner at the top right of the right sidebar indicates "Connection interrupted. Retrying...".
